

Multi-Ancestry Mendelian Randomization Study

Investigating the Causal Impact of COVID-19 on Acute Myocardial Infarction (AMI)

1

STUDY POPULATIONS

Multi-ancestry genetic data

2

EXPOSURES

COVID-19 phenotypes (from COVID-19 HGI Round 7)

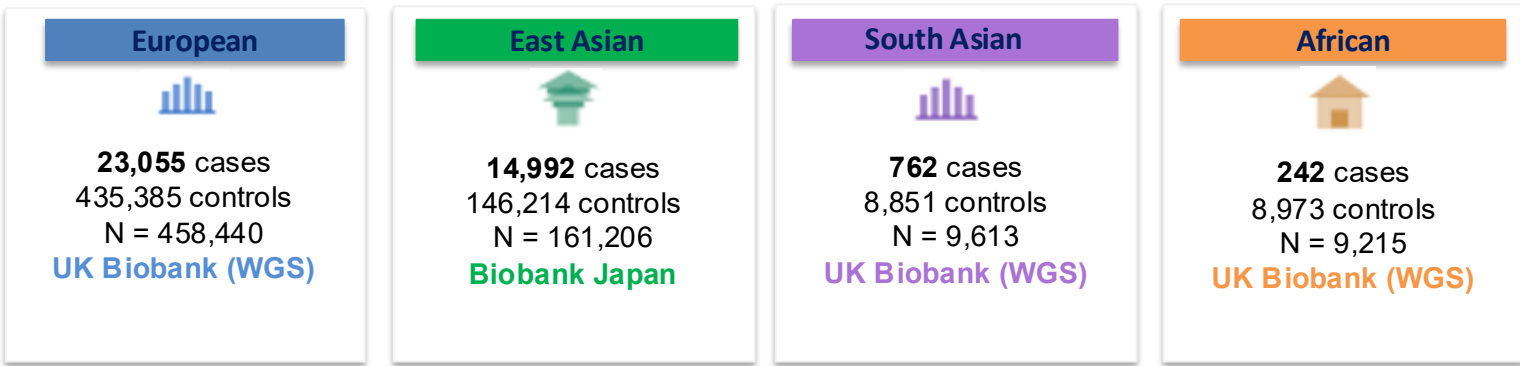

High-quality, ancestry-matched AMI GWAS summary statistics

3

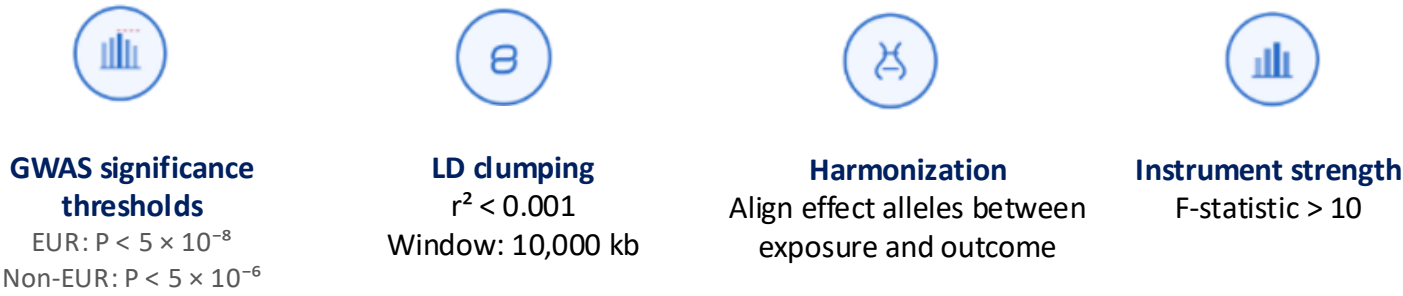

OUTCOME

Acute Myocardial Infarction (AMI)

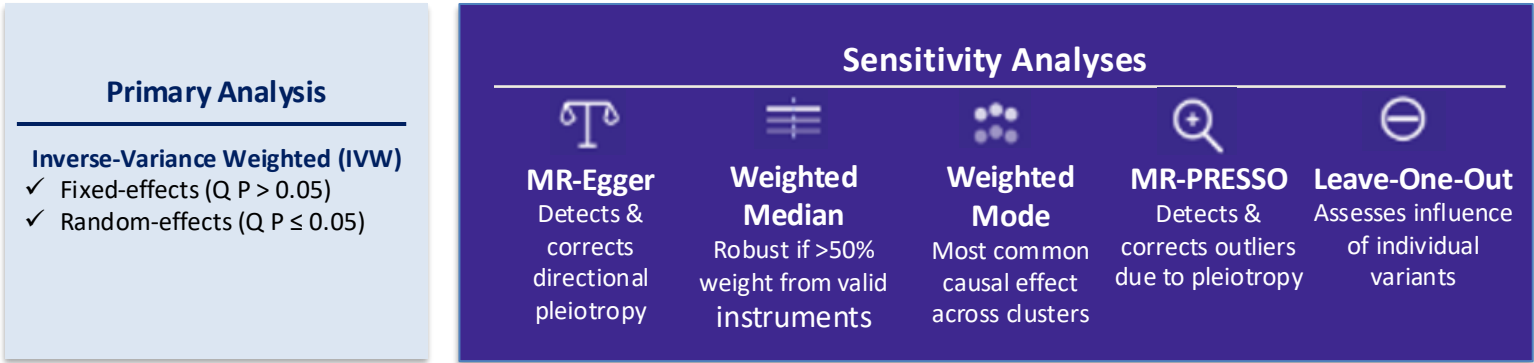

4

GENETIC INSTRUMENT SELECTION

5

MENDELIAN RANDOMIZATION ANALYSES

6

ROBUST CAUSAL INFERENCE
